Education

University of Helsinki
2011-2015

BS in Computer Science

SUMMARY

Accomplished Full Stack Developer with 8+ years of experience. Skilled in creating, testing, and deploying web application using the latest tools and technologies. Excellent problem-solving and communication skills.

Working at Several Companies as a Full Stack Developer and having hands-on experience under my belt.

Designed, built and launched 4 platforms from the ground up successfully with startups as a founding software engineer during the last a couple years.

Always try and keep the pace with the brand-new field and dig into cutting-edge technology.

Now I am working from home and prefer to work remotely.

EMPLOYMENT HISTORY

Full Stack Developer
Working from home

Apr 2019 - Present
Remote

- Created a server-side application using Node.js and Express to support real-time communication between client and server.
- Optimized websites for maximum speed and scalability, while also ensuring compatibility with various browsers and devices.
- Debugged and fixed application issues in a timely manner.
- Developed features and optimized existing code to improve application scalability.
- Developed a RESTful API to allow for interoperability between different systems.
- Utilized a variety of programming languages, including Objective-C, Java, and Swift, to build mobile applications.
- Developed end-to-end mobile applications, including back-end connectivity to web services and databases.
- Provided technical support to customers regarding software issues.
- Collaborated with other developers and designers to ensure the successful development of web applications.

Full Stack Developer
Oivan

Sep 2017 - Mar 2019
Helsingfors, Finland

- Building unprecedented UI/UX for end users using React.js
- Real time Chat using Socket.io and put human like AI
- Developed and implemented front-end architecture to support user interface concepts with 100% accuracy
- Developed a backend solution to increase system efficiency by 20%, resulting in faster completion of projects.
- Maintained and monitored backend services and databases to ensure optimal performance.
- Developed a RESTful API to allow for interoperability between different systems.
- Utilized AWS technologies to create a highly available and cost effective backend environment.
- Developed a mobile application for iOS and Android platforms that increased user engagement by 20%
- Implemented modern software development practices to optimize code performance and improve user experience
- Utilized RESTful APIs to integrate mobile applications with backend services

Full Stack Developer
Arter Oy

Nov 2015 – Aug 2017
Helsinki, Finland

- Implemented a user-friendly front-end design with HTML5, CSS3, and jQuery to ensure an excellent user experience.
- Used modern development tools such as Git and GitHub to collaborate on code and create version control.
- Optimized webpages for performance, scalability, and security using technologies such as AJAX and RESTful APIs.
- Developed a full stack application using Node.js, Express, Angular, React, Vue, MySQL and MongoDB to enable users to interact with a dynamic content management system.
- Understanding of service-oriented architecture and micro-services using Docker/containers and relational databases
- Participate in usability testing and user research to collate user feedback at all levels with detailed documentation
- Communicate frontend best practices to the team, enhancing efficiency and performance across the department
